Butterfly Flat Indoor FTTH Drop Cable patch cord/ pigtail

Best cable Solution in FTTH 's Project

IL<0.3dB Max

OMC INDUSTRY CO.LIMITED

Description

It's a kind of patch cable but assembly with **Butterfly Flat Indoor FTTH Drop Cable**. This is a last cable in FTTH project. Used widely between Fact plate, terminal box, ONU tec. With easy accessibility to the fiber and simple installation, FTTH cable can be directly connected to the homes. It is suitable for connecting with communication equipment and used as access building cable in premises distribution system. The optical fibers are positioned in the center of cable and two parallel Fiber Reinforce Plastic (FRP/KFRP) strength members are placed at the two sides. Then, the cable is completed with LSZH sheath. Also, customers can specify your required connectors.

Cable structure

FTTH Indoor Drop Cable uses butterfly flat structure, whose optical fiber unit is positioned in the center. Two parallel Fiber Reinforced Plastic (FRP) or Steel wire strength members are placed at the two sides. Then, the cable is completed with LSZH sheath. FTTH indoor cable has a much greater bandwidth to carry data and less susceptible to interference than common indoor fiber cables. With small diameter, water-resistant, soft and bendable characteristics, it's easy to deploy and maintenance. In addition, the non-metallic strength member can provide lightning protection and anti-electromagnetic interference. FTTH cables are ideal for indoor cabling, end users directly cabling, and access network.

Butterfly Flat Indoor FTTH Drop Cable patch cord/pigtail

Feature:

Good mechanical and environmental characteristic
Simple structure, light weight and high practicability
Low smoke zero halogen and flame retardant sheath
Novel flute design, easily strip and splice, simple installation and maintenance
Two parallel FRP strength members ensure good performance of anti-electromagnetic and crush resistance
Special low-bend-sensitivity fiber provides high bandwidth and excellent communication transmission property

Application

Access Networks
LAN (Local Area Network)
Fiber Optic Communication System
FTTH (Fiber to The Home) Indoor Building
Optical fiber connected and transmitted equipment

Ideal Solution by FTTH Indoor Fiber Patch Cable

Butterfly Flat Indoor Drop Cable is widely used in fiber to the home (FTTH) network system, which can directly connect the communication line from the LAN to the end users. Butterfly flat drop cable uses special low-bend-sensitivity fiber to provide high bandwidth and excellent communication transmission, it's very suitable for indoor cabling, end users directly cabling, and access network.

Packaging

This easily taken and well-protected fiber patch cable package has been labelled and marked by OMC as default. Standard carton size : 34*22*15 cm; 44*34*24 cm ; 54*39*34 cm . Which carton to be used depends on goods Qty . Packing can be customized.

1, Film wrap

2, Paper Carton

3, fumig-free Pallet
